 - (2) Date on which the lawsuit was filed: July 6, 2021
 - (3) Date on which the complaint was delivered: October 29, 2021
2. The Plaintiffs
See the Appendix.
3. The Nature of the claim and the amount claimed

 - (2) Amount claimed: US\$151,392,337.48 (¥16,828,772,234) and the amount of the relevant delay charges
4. Background of the lawsuit
In January 2018, a fire incident allegedly occurred in a transformer ("Transformer") installed in a thermal power plant ("Power Plant") in Indonesia operated by P.T. Paiton Energy. In connection with this accident, the plaintiffs filed a claim against NGK for damages and relevant delay charges based on alleged product liability and torts.
NGK is a distributor of the bushing (manufactured in 2010) incorporated in the Transformer. NGK delivered the bushing to a third-party transformer manufacturer that incorporated the same into the Transformer. The Transformer was then delivered to the Power Plant through a plant engineering manufacturer.
5. NGK's perspective and future outlook
NGK believes that it is not liable for the incident described above. Therefore, NGK will take necessary actions in response to the claim to demonstrate the quality of the bushings and the adequacy of NGK's operations.
NGK will make timely disclosures in relation to this lawsuit upon the occurrence of any incident that may have a material impact on NGK's financial results.
